(UPLB)

The SEAMEO Regional Center for Graduate Study and Research in Agriculture (SEARCA) is one of the regional research and training centers of the Southeast Asian Ministers of Education Organization (SEAMEO), an intergovernment body founded in 1965 to promote cooperation among Southeast Asian nations through activities in education, science, and culture. SEARCA's programs are designed to accelerate sustainable agricultural and rural development through human resource development, research, technology transfer, consulting services, and knowledge dissemination and exchange. It is hosted by the University of the Philippines Los Baños, which is based in Los Baños, Laguna, Philippines. It is supported by donations from SEAMEO member and associate member states, other governments, and various international donor agencies.

The University of the Philippines Los Baños is a comprehensive institution of higher learning, which started as a College of Agriculture in 1909. It now has 10 colleges and a graduate school, which offer the bachelor's and master's and doctoral degrees.

The Textbook Writing Program of SEAMEO SEARCA and UPLB was launched in January 1991. It primarily aims to produce Asian-authored textbooks for basic undergraduate courses that will have wide use in the SEAMEO member countries. An initial funding of P1.5 million (about US\$60,000) was contributed by the two institutions for the program. To provide supervision, SEARCA and UPLB organized a management committee composed of the UPLB Vice Chancellor for Instruction as chairperson and the SEARCA Director and Deputy Director as members. The program has initially tapped authors from the Los Baños Science Community (LBSC), which is composed of academic, research, and local government institutions based in UPLB and its vicinity.

Ornamental Horticulture: A Little Giant in the Tropics

CONTENTS

Preface	iii
Acknowledgment	iv

Chapter I

INTRODUCTION	1
The need for ornamental plants	1
Profile of the domestic ornamental industry	3
The plant organism and the basic requirements for its growth and development	7

Chapter II

NURSERY PRACTICES	23
Plant growth regulators, their selection, preparation, and use in ornamental nursery operations	23
Soil pH and its determination	28
Conductivity of soil and its measurement	31
Preparation of growing media	34
Plant containerization and general handling of container plants	41
Plant acclimatization	45

Chapter III

PRODUCTION OF SELECTED CUT FLOWERS	51
Anthurium	51
Baby Aster	62
Chrysanthemum	66
Heliconia	85
Orchids	99
Roses	124
Gerbera	159
Sampaguita	168
Strelitza	176
Bulbous species	185

Amaryllis and Hippeastrum	186
Calla Lily	190
Gladiolus	194
Gloriosa Lily	207
Lilium	211
Ornamental Banana	216
Tuberose	219
 Chapter IV	
FOLIAGE PLANTS	225
 Chapter V	
BEDDING PLANTS	259
 Chapter VI	
POSTHARVEST PHYSIOLOGY, HANDLING, AND STORAGE OF CUT FLOWERS AND FLORIST GREENS	271
 Index	317
