AND MICHAEL J CROSBY

The Authors

Neil Aldrin D. Mallari is Director for Communications and Network Development Program of Haribon Foundation. As a wildlife biologist, his research and scientific papers focus on ornithology and conservation biology. His crusade of biodiversity conservation has garnered invites to various scientific fora in the Philippines and abroad. He is co-author (with Nigel J. Collar and Blas R. Tabaranza, Jr.) of *Threatened Birds of the Philippines* and the WCSP's (Wildlife Conservation Society of the Philippines) *Philippine Red Data Book*. He is currently the President of WCSP and the country representative of the Oriental Bird Club.

Blas R. Tabaranza, Jr. is Director of Terrestrial Ecosystems Programme of Haribon Foundation and an elected member of the BirdLife International Global Council (1999 to 2003). A Professor of Zoology at Mindanao State University - Iligan Institute of Technology (MSU-IIT) with extensive field experience in ornithology and mammalogy, he was the first president of the WCSP (1993-2000) and a Research Associate (1994-1999) of the Chicago Field Museum. He has published several scientific and popular articles. He is one of the authors of *Philippine Red Data Book* (1997) and *Threatened Birds of the Philippines* (1999), a Haribon Foundation/BirdLife International Red Data Book.

Mike Crosby is Research and Data Manager of BirdLife International's Asia Division, based in Cambridge, U.K. He has worked for BirdLife for 12 years, as part of the team that has produced several key reference books, including *Birds to Watch 2* (1994), *Endemic Bird Areas of the World* (1998), *Threatened Birds of the Philippines* (1999) and *Threatened Birds of Asia* (2001). Since 1996, he has been helping the Haribon-BirdLife Programme in the compilation of this Important Bird Areas book, and the development of their follow-up strategy for the conservation of these critical sites. He is a keen birder, and has ornithological experience in many Asian countries.
